Definition

Conceptual	Is a targeted, aggregate result of our broader human service system that is achieved through collaborative generation of pragmatic solutions, evidence-based innovations, and shared community outcomes. It is the state at which the composite needs of a community's collective safety and well-being are achieved. Such needs are met when conditions of risk are mitigated, vulnerability is reduced, and the occurrence of harm is nil.
Practical	Combined outcome from the greatest absence of crime, addiction, mental suffering, violence, poverty, homelessness, sickness, injury and/or other social harms that a community can achieve.

CSWB Practice Typology

- collaborative risk-driven intervention
- multi-sector coordinated support
- bi-sector response teams
- multi-sector monitoring and mitigation
- community safety teams
- problem solving courts
